

## 2. Determining When a CMP is Assessed

A provider has a **Cited Finding**.

The Licensors determine if the provider had a **Cited Finding** for the **same rule** on their **most recent** prior inspection of any kind (Announced, Unannounced, Follow-up, Focus, or Complaint).

If the provider **had** a Cited Finding for the same rule on their **most recent** prior inspection, a CMP **is** assessed. This means the Statement of Findings and cover letter for **any** Cited Finding needs to include warning language that a CMP (or an additional CMP, if one has already been assessed) will be assessed if the rule is found to be out of compliance again.

If the provider **did not have** a Cited Finding for the same rule on their **most recent** prior inspection, a CMP is **not** assessed, but warning language is included in the Statement of Findings and cover letter that a CMP will be assessed if the noncompliance is not corrected..
